User Story: Create flight

As a user, I want to be able to search for flights based
on my preferred travel dates and destination, so that
I can find the best flight options.

Acceptance Criteria

- The flight search feature is easily accessible from the homepage
- The search form allows the user to input their preferred travel dates and destination
- The search results display a list of available flights that match the user's criteria
- The results are sorted by relevance (price, flight duration, etc)
- The results display relevant information such as departure and arrival times, airline, and ticket prices

User Story: View flights

As a passenger, I want to view available flights on specific date
and time so that I can book flights.

Acceptance Criteria

You can view flights based on the date and time you specified,
and you can see each flight details on that date

User Story: Book flight

As a user, I want to be able to view detailed information about each flight, including the
itinerary, flight times, and ticket prices, so that I can make an informed decision about
which flight to book

Acceptance Criteria

- If there is available flight on the specified date from the departure airport and destination airport, I can book our flight.
- The user can view the flight times, including the departure and arrival times, and the duration of the flight.
